

Research on Social Relationships Among Custodians of Intangible Cultural Heritage, Zisha Pottery: A Perspective from the Field of Art Anthropology

Abstract: Using Bourdieu's theoretical framework, this study conducted extensive fieldwork and comparative analyses to scrutinize Zisha pottery industry in Dingshu Town, Yixing, focusing on its status as an intangible heritage. Through the lens of art anthropology, this research delves into the historical context that gave rise to ecological settlements centered around Zisha pottery production and the complex power dynamics that shape relationships between settlements.

By undertaking longitudinal temporal comparisons and horizontal analyses of artisans and their sales methods, this study investigates the social organizational structures, modes of skill transmission, product characteristics, pricing strategies, and other elements influencing the social organization of practitioners within Zisha pottery industry. Drawing upon the theoretical framework of "cultural reproduction," it analyzes the roles of cultural capital and social capital in shaping social identity among Zisha pottery artisans beyond their surface appearances. Furthermore, it elucidates the process leading from the formation of social identity to the materialization of capital.

Key words: art anthropology, Zisha pottery, Bourdieu, cultural reproduction, intangible cultural heritage

Introduction

Art anthropology is an interdisciplinary field that uses anthropological research methodologies and perspectives to explore subjects and themes in the art domain. In China, 'intangible cultural heritage' (ICH) represents a unique national and folk art aspect. The cultural relationships and current status of these folk arts require thorough investigation and discourse from an art anthropology perspective, supported by extensive ethnographic research.

This study is based on the research materials collected during my fieldwork conducted in Dingshu Town, from 2022 to 2023, concerning the intangible cultural heritage (ICH) of Zisha pottery. Zisha pottery is a special type of handcrafted clayware originating from Dingshu, a town well-known for the excavation of Zisha in China. In May 2006, Zisha craftsmanship was appointed as an inaugural item on the National List of Intangible Cultural Heritage. Additionally, in 2018, it was added to the initial batch of the National Catalog of Traditional Craft Revitalisation. Even in the post-intangible heritage era, Zisha pottery is continually evolving in this region. Accordingly, I chose Yixing as the location for my fieldwork.

During my formative years, I immersed myself in Zisha pottery studios within Ceramic Town, situated in Dingshu Town. Consequently, I routinely strolled through the streets, observing the daily lives of artisans from diverse backgrounds. When I first visited Ceramic Town during my elementary school years, Zisha pottery industry was in an active phase, driven by several factors, such as the propagation of Taiwanese Zisha pottery culture. During that time,

it was common to see tour buses parked near hotels during the day, as groups of tourists headed to various studios and wholesale shops. Subsequently, the once-booming Zisha pottery industry began to decline over time due to shifts in tourism patterns and eventually had to temporarily shut down as a result of the pandemic. In response, it adapted to the growing popularity of online operations and live streaming.

While documenting cultural transformation within the realm of Yixing Zisha pottery, I discerned that, as an intangible cultural heritage, it possesses distinctive characteristics when compared to other ICH items. The cultural evolution of Yixing Zisha pottery teapots, in particular, differs from that of other traditional crafts. Therefore, I undertook a journey to investigate this cultural transition. Through an analysis of shifts in production methods, I investigated changes in the identity of folk artisans, their social organizational relationships, their social structure, and the cultural framework. This inquiry has afforded me valuable insights into the process of cultural reproduction within craft-centered communities.

II. Research Overview

Based on the theoretical framework of art anthropology, this study employs participant observation and comparative methods to investigate various aspects of Zisha pottery industry. Specifically, an examination of Zisha pottery factories, retail shops, workshops, and commissioned sales agents will be included. Furthermore, the research is conducted on a unit basis, focusing on markets or villages. It seeks to understand the distribution of shops and workshops, the origins of the workforce, specific roles and trades performed, pricing regulations, distribution channels, and more within these units.

1. Development of Zisha Teapot Production

The Zisha teapot, which has its peculiarity compared to other varieties of Zisha pottery products, traces its origin to the Ming Dynasty, according to prevailing academic consensus. The Ming and Qing Dynasties witnessed their initial heyday, marked by the emergence of master artisans. After the founding of the People's Republic of China, Zisha pottery industry continued to flourish—the 'Seven Old Artisans' initiated training in Zisha pottery craftsman at Zisha pottery Factory. Later, Yixing Zisha pottery ceramic industry experienced rapid growth in 1980s. With the influence of foreign trade orders after the 1990s, other items, such as tableware and flower pots, they were moved towards mechanisation and mass production. However, the intricate craftsmanship of teapots prevented such mechanization, resulting in their value being closely linked to their artisans. Under the influence of foreign ceramic experts, mainly from Japan, teapot makers innovated and reintroduced personal seals on their creations. Dormant family-based workshops were revived.

The history of Zisha pottery reveals a unique aspect of this intangible cultural heritage—it is intrinsically linked to its artisans. Teapot designs, which were originally associated with their creators, remain distinctive. Despite attempts at replication, significant variations in value persist. The use of personal seals and the resurgence of family-based sales underline the importance of 'branding' in the context of irreplaceable artisanal craftsmanship. By

3. variations in the production and sales units, together with their sales patterns

The inheritance subjects in these villages are different, with different sales methods and different profit models. The exhibition spaces serve as a direct visual representation of these differences. For production-oriented workshops, their daily activity space is their own homes or rented shops, and they do not have a high demand for the exhibition of teapots. For shops primarily focused on sales, there is a greater demand for space dedicated to product display.

Zisha pottery teapots hold both aesthetic and functional value as vessels for brewing tea. The utilitarian exhibition of these teapots plays a crucial role as a strategy for sales. During tea tasting sessions, sellers and purchasers engage in a cultural exchange featuring tea and pottery, establishing relationships. Purchasers gain a deeper comprehension of the seller or artisan. They are creating a transition from the teapot to the person. The purchase of a teapot also serves as a form of recognition and appreciation for the artisan who made it.

Online sales are nowadays a sales method adopted by all kinds of inherited subjects. Indeed, different subjects have different selling points when displayed online. Some of them take cost-effectiveness as the main selling point, some mainly promote craftsmanship, and some focus on promoting the title and reputation of pot makers. As previously stated, the pricing of Zisha pottery teapots has distinct peculiarities and is not solely reliant on labour time and process complexity.

The social status of the maker contributes significantly to the Zisha pot, exerting a considerable impact on its price. In fact, there exists a hierarchical title system for potters, comprising the following main titles: painter of handicrafts, assistant industrial artist, industrial artist, and senior industrial artist. This structure progresses to the provincial level of honours with titles such as Jiangsu Provincial Celebrities and Jiangsu Provincial Masters of Crafts and onwards to national honours. Masters of Chinese ceramic arts are highly regarded, with the Masters of Chinese Arts and Crafts topping the list. Furthermore, a positive reputation significantly impacts the price of Zisha pots due to the cumulative effect of people's perception of pot makers. As the pot maker's fame grows, customers are delighted to see their initial purchase of Zisha appreciate in value. This process demonstrates the influence of social and cultural capital on the Zisha pots market.

III、Cultural Capital and Social Capital Behind Zisha Industry

1、From Farmer to Master: Historical Reshaping of the Social Identity of Folk Artists

Before the reform and opening up, the production of Zisha pot wasn't exclusively carried out by state-run and collective factories. When these factories were unable to fulfil orders on time, they would resort to outsourcing some of their fabrication and production processes to neighbouring farmers. With the intention of imparting basic Zisha moulding expertise, Zisha Craft Factories frequently dispatched technicians to rural areas to train farmers on how to make uncomplicated teapots. This implies that the neighbouring farmers acquired fundamental Zisha-making capabilities.

After the mid-1980s, following market liberalisation policies, some farmers gained the opportunity to sell their produce directly on the market, which resulted in lower prices than those offered by factories. As the government had not regulated the mining of Zisha ore, numerous farmers in the neighbourhood excavated and used Zisha ore in the mountains for free. Furthermore, the collective factories incurred management costs, giving the farmers' pots a competitive edge in pricing and securing orders and markets. Over time, there has been a shift in teapot procurement from Dingshu Town, moving away from factory purchases. Instead, merchants with a sustained demand for teapots now prefer to order directly from local workers, farmers, and craftsmen who produce these teapots. However, the absence of quality control in these private farmhouse workshops and other Zisha pot production units led to variations in quality. This, in turn, has created a challenge in distinguishing between authentic Zisha pots and mass-produced 'factory goods,' shaping future issues in the Zisha pot industry.

In addition to external factors like market fluctuations, the revival of Zisha can be attributed to three main internal factors: Firstly, Zisha's molding process requires minimal tools and does not demand specialized labor. Basic tools and a clay stool are sufficient, allowing easy entry into the industry with a low capital threshold. Secondly, state promotion has played a role. During the transition from a planned economy to a market economy, state policies granted craftsmen more freedom, harnessing their enthusiasm and initiative. Thirdly, beyond the apparent intellectual liberation engendered by open-door policy reforms., at its core, craftsmen with a resolute work ethic were energized by the open-door policy to undertake a succession of endeavors aimed at fully actualizing their potential.

Folk artisans evolved from farmers who made pots during their leisure time, earning them the titles of "folk art masters" and "folk craftsmen". This led to a new standard for dividing their social identities and motivated them to remodel their way of life. Identity, fame, skill, and wealth are now key words in the lives of these artisans, who must adapt to the changing demands of the Zisha industry in today's social context. This change has also prompted them to develop a new value system, modify their behavior patterns, and reshape their social image.

2、 The Cultural and Social Capital Behind the Social Identity of Contemporary Non-Heritage

Professor Rong Shuyun observes that urbanization and the national protection of "Intangible Heritage" have resulted in a substantial shift in the organization and production of traditional crafts. Farmers, labourers and others have shifted into different roles, including inheritors of intangible cultural heritage, masters of the fine arts and cultural ambassadors (Rong, 20xx). And this phenomenon also exists in the Zisha industry.

Comparing this article, we can find that the social identity construction of Zisha artists can also be divided into two categories: one is dynamic identity construction, which is mainly driven by the survival interests of artists; The other type is structural identity construction,

which is mainly driven by the demand of "state ideology", to "recruit" individuals or collectives through non-compulsory means, and realise government-organised social development initiatives. Zisha artists often acquire their social identity based on factors such as skill level, lineage, experience, and social reputation, which exemplify dynamic identity construction. Social structural identity construction includes participation in various art exhibitions and government-organised social activities, such as receiving awards at the World Expo or from the state. In the post-intangible heritage era, artisans have come to understand the importance of acquiring 'social identity' through their involvement in craft production. These two modes of identity construction help us gain a clearer understanding of the process of identity formation.

For an artist, the social validity of a specific identity is usually divided into two categories: self-categorisation and categorisation by others. From the self-categorisation perspective, different levels of ICH (intangible cultural heritage) identities have different perceptions of personal behaviour and rights to engage in social activities. Taking Ms. Wang Yinxian as an example, she is the representative inheritor of the initial group of national ICH projects in Zisha pottery production techniques and also a Chinese master of arts and crafts. The act of folk artists being named by the authorities is a classic manifestation of being "categorised by others".

This proves that these artists have already acted as a kind of "social entity" to prove to the world the legitimisation of their existence and the "necessity" of their existence. The identity of these artists is recognised by the certificate of the cultural administration department, which represents the "power of the state", and is thus collectively recognised by the society. In the course of this process, those "masters of arts and crafts" and "non-genetic inheritors" gradually accumulate their own "cultural capital" in the new era.

Throughout the selection mechanism of non-genetic inheritors (NGIs), their cultural and social capital act as distinct and direct elements. Among them, cultural capital refers to the amount of knowledge, ideas, skills, behaviours and other cultural resources an individual possesses. The amount of cultural capital has a significant impact on an individual's life, growth and development and is closely linked to an individual's economic wealth, social status and so on.

Pierre Bourdieu proposed the concepts of cultural capital and social capital. Specifically, Bourdieu divides cultural capital into three states: the state of concretisation, the state of objectification and the state of institutionalisation. Cultural capital in the state of concretisation refers to cultural assets that have a direct connection with the individual's body. It includes cultural knowledge, skills and cultivation that can be internalised through family education and formal schooling and manifest as personal cultivation. The cultural capital in the objectified state exists in the form of cultural commodities, which is the materialisation of cultural concepts and abilities. Objectified cultural capital has two essential characteristics: materiality and symbolism. Zisha teapots are a tangible embodiment of Zisha cultural capital, while also carrying the essence of Zisha culture. When Zisha artists engage in professional title evaluation, their cultural capital is expressed through academic qualifications such as

graduation certificates, organisational certificates and professional title certificates. This cultural capital, having received institutional recognition, assumes an institutionalised state.

Social capital is a collection of actual or potential resources, often a network of institutionalised relationships. It supports each member from the perspective of collectively owned capital and gives them 'credentials' of 'prestige'. There is also a vast network of relationships in the Zisha industry. The identity of Zisha practitioners can be multifaceted. They may run their studios while also holding positions in schools, carrying on the legacies of their families or masters, and fulfilling responsibilities and obligations as members of political parties.

One significant aspect of social capital within the context of Zisha pottery industry is exemplified through the master-disciple lineage. Within the dynamic, there exists not only a relationship of knowledge and skill transmission between the master and the apprentice but also a reciprocal exchange of social capital. Resources from the master's social circles may flow to the apprentice, and the clientele that initially purchased the apprentice's works may also shift to the master, showing an interest in collecting the master's creations. Another obvious form of Zisha social capital is curating exhibitions or participating in events. Zisha artists travel abroad to participate in self-funded or publicly-funded exhibitions, where they accumulate clientele and enhance their reputation. Provincial CPPCC member and Chinese Ceramic Artist Lv Junjie (whose father is Mr Lv Yaochen, the Chinese Master of Arts and Crafts) brought his Zisha artwork to the United Nations Headquarters in New York for the first time in November 2016, where the UN Headquarters permanently collected it at the opening ceremony. At the 2017 CPPCC meeting, his proposal also promoted the declaration of Zisha as a world-class non-legacy. This reputation not only exists within the handicraft industry but also extends to broader societal realms, attracting a diverse clientele. Certainly, online sales demonstrate the involvement of social capital more clearly. The emergence of specialised Zisha sales agents and efforts to maintain and expand the customer base through online sales are also part of the ongoing process of social capital reproduction.

In the evaluation of craftsmen, the key indices are "technique" and "lineage", which serve as rigid selection criteria. Behind this competition, there's actually a lot of cultural and social capital behind the artisans. Some argue that the selection criteria for heirs are essentially the 'credentials' of their family's historical and cultural heritage. When assessing the candidates for the selection of the Masters of Arts and Crafts, it is remarkable that they all have exceptional skills, influential mentors or inspiring life stories. Their experience, gained through years of dedication and participation in various competitions, enables them to cultivate extensive networks. As a result, they have compelling stories to tell when interviewed by the media or when interacting with scholars. For candidates with somewhat similar technical skills, factors such as pedigree, work experience, family history, and social status become quantifiable criteria within the Master's assessment system. The intricate progression of a Zisha craftsman through successive stages of evaluation to the status of master, and the complex web of relationships that develops in the process, can best be understood through Pierre Bourdieu's framework of the 'field'. This progression represents a

significant cultural practice within the domain of non-heritage while also serving as a notable 'cultural event'.

As Bourdieu wrote, "different and stratified social practices, together with the educational system, tend to favour members of society who, by virtue of their position in the class system, become the 'natural' inheritors of cultural capital". The acquisition of this social capital reflects a control mechanism at work in political society. In his "Theory of Practice", Bourdieu elaborates on this: "Rights are acquired through the practical proof of established orders. This acquisition of order is used as a smokescreen to obscure the connection between one's qualifications for social activity and identity and the cultural capital one inherits". It is evident that the exercise of this cultural and social capital in the "non-heritage field" is concealed. Both forms of capital can be transformed into symbolic capital, which leads to tangible benefits. This symbolic capital is intrinsically linked to the acquisition of the identity of heritage practitioners.

In the process of constructing their 'social identity' through cultural and social capital, Zisha artisans must pass through a 'threshold' and a transitional period. These phases are competitive and often require considerable investment, including time and effort, to gain recognition from certain social institutions. They must also be prepared to spend money on setting up open workspaces and managing new interpersonal relationships. While these actions may seem counterintuitive to immediate economic gains, they represent non-heritage subjects' 'behavioural patterns' during the transitional phase of social identity construction. These patterns of behaviour collectively shape a particular 'social issue' and 'social phenomenon' that becomes a 'cultural fact' in a particular period.

IV. Zisha Ecological Space: From Social Identity Construction to Economic Capital Realisation and Cultural Reproduction

Bourdieu wrote, "Social identity only becomes important when people feel threatened or benefit from it". When I asked about the importance of social rankings for Zisha artists during my research, one said: 'These rankings are undoubtedly essential. The frequency of Zisha artists' participation in events and exhibitions is closely linked to their social identity. In the Zisha market, the higher the status of an artist, the more social activities they engage in and the greater their social influence. This, in turn, enhances the reputation of their studios and leads to higher profits'. Such answers have become a consensus among insiders in the Zisha community.

Through this consensus, we can gain a better understanding of the current situation in the Zisha teapot market, which is characterised by significant premiums and inconsistent price evaluation criteria. An interesting point was raised during an interview with a resident in Yixing who is responsible for online sales of Zisha teapots. They mentioned searching for suitable Zisha artists to contact based on customers' different psychological price points. For lower price points, they emphasise high cost-effectiveness and quality in sales, while for higher price points, they focus on promoting the added value that an artist's social identity

brings to their work. This behavior strongly reflects the relationship between the artist's social identity and the realization of capital.

The presence of cultural reproduction becomes evident by situating the construction of personal identity on a broader space. The development of folk artisans' social identities in the post-intangible heritage era reflects the role of 'national ideology' as a modern mechanism of power. Rather than using coercive measures to govern the population, it now attracts individuals through education, media and belief systems. This is in line with Pierre Bourdieu's emphasis that "individuals are not personalised entities but creative elements within the social process". It is evident that while individuals actively acquire their social identities, the dominant ideology also selectively distinguishes and chooses the subjects of society, transmitting a particular 'ideology' to the collective social body through selected 'agents', thereby facilitating the reproduction of localised social culture.

In summary, the acquisition of 'social identity' is the result of multiple layers of social discourses that provide artisans with qualifications for social activity, serve as evidence of the 'natural' inheritance of cultural capital, and provide means to acquire wealth. Therefore, Zisha artisans seeking to accumulate wealth inevitably become entangled in the social production network of identity, skills, social resources and cultural capital. This network teems with negotiations and exchanges between different entities, effectively reshaping their social relations. These social relations, in turn, give rise to new socio-cultural norms, values and behaviour patterns.

V. Summary:

Through a comprehensive analysis of the diverse groups involved in the production of Zisha, we can perceive that the development of folk art within the cultural framework is inherently intertwined with the behaviours and perceptions of the production subjects. Particularly in the post-non-heritage era, as production subjects pursue social, cultural and technological capital, different production models emerge. And new market demands have given rise to diverse identities of production subjects, breaking down the old order, including neighbourly relationships and mentor-apprentice relationships. As a result, a new social framework has been constructed, rooted in contemporary Zisha production and sales, redefining social relations. When analysing the inheritance and development of traditional folk crafts, it is crucial not to focus solely on the contributions of folk artists. Instead, we should also pay attention to the reciprocity and negotiation of various forces, including the power struggle between folk artists and various authorities in the realm of knowledge discourse, as well as the dynamics of interests that shape their interactions.

When scrutinizing the inheritance and progression of traditional folk crafts, it's clear that many artisans are still involved in Yixing pottery production every year. In fact, more and more university graduates are willing to enter the industry. However, the vitality of Yixing pottery today cannot be measured by quantity alone. Its diverse forms and their relationship with social development types should be evaluated. Yixing pottery has become a relatively

comprehensive ecosystem, brimming with competition and potential, in which folk artists not only shape their own social identities but are also shaped by society.

recordings (collated into a text version, not attached to this paper) and photographs taken during the survey:

The main interviewees were arts and crafts master Wu Ming, national senior arts and crafts master Hu Chunfu, who was engaged in the online sales of Zisha, and the rest of the people were interviewed in a simple research.

艺术人类学视域下“非遗”紫砂传承主体的社会关系研究

(英文的有删改)

摘要：从布迪厄的视角出发，进行大量田野调查和对比，在艺术人类学的视域下对宜兴市丁蜀镇的非遗紫砂产业进行调研，重点探寻紫砂壶生态聚落形成的背景以及聚落之间互相博弈的力量。

从纵向的时间线对比，到横向的不同传承主体及其销售方式的比较，研究发展背后从业人员之间的社会组织形式、技艺传承方式、生产产品内容、价格定位规则等，结合“文化再生产”理论分析在这些表象下文化资本与社会资本对于紫砂艺人社会身份的塑造，进一步描述从社会身份的建构到资本实现的过程。

关键词：艺术人类学、后非遗时代、紫砂、文化再生产、布迪厄

一、引入

艺术人类学作为一门跨学科的研究，致力于用人类学的研究方法和研究视角去研究艺术学的对象和内容，而“非遗”是我国民族民间艺术的外显特征，这些民间艺术的发展现状与现象背后的文化关系问题，都有待我们从艺术人类学的研究视角，通过大量的田野考察来研究与讨论。（由方李莉教授提出的“后非遗时代”这一概念，也突出强调了在非遗保护工作中，无论是国家顶层设计，还是当地政府、学者、设计师、艺术家等都介入在内的“非遗保护运动”的社会实践。）（——这段后来去掉了）

本文基于2022-2023年我在江苏宜兴进行的田野调查和采集的有关紫砂非遗的研究资料。宜兴紫砂壶是中国特有的手工制造陶土制品，其制作原料出土于宜兴市丁蜀镇。2006年5月，宜兴制陶技艺被列入第一批国家非物质文化遗产名录，2018年，它入选第一批国家传统工艺振兴目录，而在如今的后非遗时代，紫砂随着时代的变化吸引着我探索与剖析。

我从小在紫砂工作室和陶瓷城这一大空间活动，经常走街串巷，观察不同身份的手工艺人和他们的生活日常。当我小学，刚进入陶瓷城这一空间时，紫砂行业受台湾紫砂

文化宣传等诸多影响，正位于一个火热的阶段。当时白天会有许多大巴停在酒店的停车场，旅游团队涌下大巴，涌向各类工作室和批发店。而后紫砂行业的滚滚热潮逐渐趋于平静，受旅游淡季的影响，再到疫情阶段的短暂闭店，而后随着线上运营和网络直播的热潮兴起，紫砂的售卖形式也在不停转变中。

在对紫砂文化变迁的整理过程中，我发现紫砂作为“非遗”，与其他非遗相比，有其特殊性，其中紫砂壶的文化变迁也与其他传统手工艺不同。于是我以探究文化变迁为引，研究该传统手工艺的复兴样态，通过考察生产方式的变化下民间艺人的身份认同、社会组织关系、社会结构、文化秩序等的变化，反观手工艺类村镇建设的文化再生产。

二、调研整体介绍:

(基于艺术人类学的理论，采用田野调查和对比的研究方法对宜兴市丁蜀镇的紫砂陶工厂、紫砂商铺和紫砂作坊，紫砂代销商等展开调查，以市场或者村子为单位、了解其中商铺和作坊的分布，从业人员的来源、具体分工、从事的行业和工种、定价规则、销售渠道等。)

1、宜兴紫砂壶生产的发展变化简述

首先值得强调的是，紫砂壶相较于其他紫砂品种，有其特殊性。关于紫砂壶的起源年代，紫砂学术界目前默认为明朝。明清是紫砂的第一个高峰期，大师频出，后期一直存在仿制明清紫砂壶的现象，从建国以后紫砂行业复兴，“七老艺人”在紫砂一厂（1997结束官方经营）开班投课进行紫砂技艺的传承与创新。（文革时期，紫砂行业也没有暂停，进行“文革壶”的制作。壶相较于其他品类的特殊性逐渐显现出，相较于缸、盆的重复固定花纹，承载了更多制作者的特殊含义。）去掉

20 世纪 80 年代宜兴紫砂陶行业井喷式地发展，随着 90 年代以后外贸订单的影响，餐具、花盆等器皿走向机械化与批量生产，而壶这一特殊品类由于其工艺的特殊性，无法实现机械化，因此其价值与制壶者的关系愈发密切。

制壶者受日本等国外陶瓷技术专家影响下进行了继承创新。此时，个人章也开始被制壶名手们在紫砂壶上启用，同时消亡了很久的家庭手工业式的紫砂茶壶作坊渐渐兴起。

从紫砂的发展历史我们可以发现紫砂这一非遗的一个特点——与其制作者的高度相关性。广为流传的壶型基本上是与其最初制作者捆绑的，尽管后来有很多人进行模仿制作，但是其价值相差较大，而从个人章的启用和家庭式销售也可以看出类似于“品牌”的理念对于紫砂这一非遗的重要程度，其无法被机械替代的特点也决定了在以“人”为主的非遗传承下，传承主体的多元化，销售模式的多样化等，致使紫砂生态也更复杂。

2、紫砂产业在当地的分布:

紫砂行业的生产主体分为多种，即使是类似的聚落，其具体运作模式也不太相同。大致分为，紫砂批发商、紫砂厂/紫砂城、个人工作室、家庭作坊、紫砂生产合作社、合作代销商。

- 1) 以生产为主的聚落：上袁村、红卫村、潜洛村、汤渡村、尹家村、希望村（西望紫砂陶瓷专业合作社是全国首个以手工艺人自愿结社的农民专业合作社）
- 2) 生产、销售综合性的聚落：华丰市场、紫砂工艺厂、方井紫砂城，中国陶都陶瓷城他们以售卖各个档次的紫砂壶、以售卖小型器物，紫砂茶具为主，有很多“高级工艺师”“初级工艺师”等职称的艺术家开办的工作室。空间多为生产、展陈、销售一体式
- 3) 蜀山老街：曾经是码头，作为紫砂水运的主要承载中心，现多坐着大师后人的紫砂工作室和名人故居。兼具观光景点与商业街的功能。
- 4) 丁蜀镇通蜀路（俗称大师一条街）：空间以展陈为主，是徐秀棠、鲍志强、毛国强、吴鸣等中国工艺美术大师、中国陶瓷艺术大师开办的紫砂壶生产和销售的公司所在地。周围聚拢了一批制作紫砂壶、紫砂茶具的工作室和作坊，他们的特点是以名望和师承为重要宣传点。

3、不同生产和销售主体及其销售模式：

这些村落中的传承主体不同，销售方式不同，盈利模式不同。空间的展陈便是直接的表现。对于生产为主的工作室等，他们的活动空间便是在自己的家或租的店铺，他们对于烧制成的壶品的展陈需求不高。而销售性为主的店铺则对于空间展陈的要求更高。紫砂壶除了拥有观赏价值之外，也具有泡茶的实用价值，对于紫砂的功能性展示当然也是重要的销售方式。卖家与买家在品茶中交流茶文化及壶文化，建立起关系，买家当然也对卖家/紫砂艺人本人的了解更加深入，这是一个由壶及人的过程，购买壶的行为也是对制壶人的肯定与认可。

线上销售是现如今各种传承主体都有在采取的销售方式，当然，不同主体线上展示的侧重点不同，有以性价比为主要售卖点的，有主要宣传工艺的，也有重点宣传制壶人职称及名誉的。前文有提及紫砂工艺的定价有其特殊性，并不是完全按照劳动的时间和工艺的复杂程度来定价的，制作者的社会身份给紫砂壶带来的附加价值对紫砂价格的影响很大。紫砂壶的职称体系存在着类似金字塔的结构，紫砂的主要职称有工艺美术员、助理工艺美术师（简称助理）、工艺美术师、高级工艺美术师，再往上是省级荣誉称号：江苏省名人、江苏省工艺美术大师、再往上是国家级荣誉称号：中国陶瓷艺术大师，最高的是中国工艺美术大师。除此之外，类似的名誉也很多，在这些名誉的叠加效应下，由人及壶，紫砂壶的定价也受此影响，更多的消费者也乐于看到随着制壶人的名气变大，他们原先所购买的紫砂随之升值。在此过程中，我们可以看到社会资本和文化资本的运行。

三、紫砂生态背后的文化资本与社会资本

1、从农民到大师：历史上，民间艺人社会身份的重划分与重塑

改革开放之前，紫砂的生产不再完全由国营和集体制工厂独家承担。当工厂无法按时完成订单，它们会不得已地将部分生产和制作任务外包给附近的农民。为了教会农户简单的紫砂制作技巧，紫砂工艺厂定期派遣技术人员到农村支持建设，并教授农民制作简易的茶壶。换句话说，附近工厂的农户掌握了一定基础的紫砂成型技术。

进入到 20 世纪 80 年代中期以后，随着市场流通的许可，一些农民做的壶也能够直接在市场上进行出售，并且价格会比工厂的价格便宜。因为当时政府尚未对紫砂矿料的开采进行管控，许多附近的农民在山地中挖、捡的紫砂矿不需要成本（现在矿料已经停止开采），加上集体制工厂存在管理的成本，所以农民壶凭借价格优势会赢得一部分的订单和市场。于是，一些长期在丁蜀镇采购的客商慢慢不从工厂中采购，直接从工人、

农民、手艺人家里订购茶壶，久而久之工厂的订单则越来越少。同时由于缺少质检环节，这些在农家等私人作坊中生产和制作的紫砂壶则因为质量的参差不齐以及与大型工厂生产的“厂货”之间的争斗也就引起了日后紫砂壶、紫砂泥料真假难辨问题的出现。

除去市场波动的外部因素不谈，其紫砂复兴的内部因素主要有以下三个方面：第一，与成型工艺的特性有关，紫砂在成型过程中对场地、工具的要求较低，且不要求分工，一张泥凳和一些简单的工具就可以满足，几乎不需要任何资本的低门槛意味着任何人都可以快速的进入到这个行业；第二，与国家的推动有关，在计划经济向市场经济转型的过程中，国家颁布的相关政策给与了手艺人更多的自由度，从而充分地调动了人们的积极性和主观能动性；第三，与时代背景和手艺人本质有关，表面上市场经济带来的是手艺人思想的解放。但其本质是有着吃苦耐劳精神的手艺人在受到改革开放的鼓舞之后，进行了一场以实现自我能力为目的行为实践。

民间艺人由忙时种田闲时制壶的农民变成“民间美术大师”“民间手艺人”，这促使民间艺人对自身的社会身份有了新的划分标准与重塑动机。身份、名望、技艺、财富成为民间艺人绕不开的生活关键词，他们也有了新的价值体系、行为模式和社会形象去适应新的社会语境下的紫砂业的发展。

2、当代大师的背后：现如今非遗传承主体社会身份建构与其所需的文化资本与社会资本

荣树云副教授在《互惠与博弈：后非遗时代杨家埠木版年画传承主体的社会关系研究》这篇文章中提到，随着城市化的发展和国家“非遗”保护工作的开展，民间的工艺生产组织和生产方式发生了巨大的变化，农民、工人等转变成了非物质文化遗产传承人或美术大师、文化代言人，这种身份转变特别有意思。通过田野调查我发现，紫砂行业也存在这一现象。

对比这篇文章，可以发现紫砂艺人社会身份的建构也可以分为两类：一类是能动性身份建构，这种身份的建构动力主要是来自艺人生存利益的驱动；另一类是结构性身份建构，这种身份建构的动力主要来自“国家意识形态”的需求，目的是通过非强制性手段去“招徕”个人或集体，实现政府层面开展的社会建设活动。紫砂艺人社会身份的获得往往与他们的技艺水平、传承谱系、从业年限、社会声誉等相关，这属于能动性身份建构。而为了社会身份的获得而从事的一系列政府组织的社会活动，如世博会获奖、各类艺术类展览的参与与评奖，国家授予的职称和头衔等，这些都属于社会结构性的身份建构。后非遗时代，艺人在手工艺生产的社会实践中逐渐领悟到的“社会身份”获得的重要性，这两类身份建构的方式必不可少。

对于一个艺人来说，某种身份的社会有效性，通常分为自我归类与被其他人归类两种。从自我归类来看，不同级别的非遗传承人身份，拥有不同的个人行为认知与社会活动参与权。如第一批国家级非物质文化遗产项目宜兴紫砂陶制作技艺代表性传承人，中国工艺美术大师汪寅仙女士，从“被他人归类”来看，民间艺人的社会身份被“权威者”命名为“工艺美术大师”、“非遗传承人”、“艺术大师”等，证明这些艺人已经作为一种“社会实体”向世人证明自身存在的合法化以及存在的“必要性”。这些艺人身份拥有代表“国家权力”的文化行政部门的证书认定，从而得到社会集体认可的，体现了“工艺美术大师”“非遗传承人”所拥有的新时代“文化资本”。

本文所用文化资本、社会资本的概念均系由法国社会学家皮埃尔·布尔迪厄 (Pierre Bourdieu) 提出。纵观非遗传承人的评选机制，其文化资本与社会资本成为一种鲜明、直接的要素。其中，文化资本指个人所具备的知识、观念、技艺、行为等文化资源的多

寡。这些文化资本的多寡会影响个人的生活、成长与发展，并与个人的经济财富、社会地位等相提并论。

布迪厄区分了文化资本的三种状态：具体化状态、客观化状态和体制化状态。具体化状态的文化资本，是指与个人的身体直接联系的文化资本，它能通过家庭教育和学校教育内化为个人身体中的文化知识、文化技能和文化修养，外显为制壶人的个人修养。客观化状态的文化资本是以文化商品形式存在的，它是文化观念和文化能力的物化。客观化的文化资本具有两种基本特征：物质性和象征性。紫砂壶便是文化资本的一种客体化体现。体制化状态的文化资本是经过某种制度确认的文化资本，它的常见的或典型的表现形式是通过毕业证书、单位证书和职称证明等确定的学术资格或文化程度。紫砂艺人的职称便是体制化状态的文化资本。

社会资本是实际的或潜在的资源集合体，这个集合体往往是一种体制化关系的网络，它从集体性拥有的资本的角度为每个会员提供支持，赢得“声望”的“凭证”。事实上紫砂行业也是存在着一张张巨大的关系网络的，紫砂从艺者的身份可能是多重的，他可能同时在校任职，可能肩负的家族或师门的传承，可能作为党派成员具有其责任与义务。最为明显的是师门的传承，师徒间不仅是传承关系，更存在社会资本的交换。那些源自师父的社交圈向徒弟进行流动，而原先消费徒弟的作品的客源也有可能流向师父，希望收藏师父的作品。另一种明显的社会资本是策展或参与活动，紫砂艺人到外地参与自费或公费的展览，在展览中积累客源，提升名望。省政协委员、中国陶瓷艺术大师吕俊杰（父亲是中国工艺美术大师吕尧臣先生）2016年11月把紫砂艺术品首次带到纽约联合国总部参展，在开幕式上被联合国总部永久收藏。在2017的政协会上，他的提案也是有关推动紫砂申报世界级非遗的。这种声望不仅是存在于手工业内的，更存在于广泛的社会范畴，吸引了客群。当然，线上销售更明显的体现出社会资本的参与，专门的销售对接者行业的产生，线上销售对于客源生态的维护和拓展也是对于社会资本的再生产。

一个手艺传承人在评选表中所填的内容，其中“技术”“传承谱系”是评选标准的硬指标，而这些标准的背后，其实是需要强大的文化资本与社会资本来支撑的，也可以认为是传承人的评选标准就是传承人家族的历史文化积累的“凭证”。从工艺美术大师的评选来看，首先他们都有过人的技艺，有好的师承，或有励志的故事，长期的工作积累了大量的人脉，无论是媒体还是学者前来采访，都有故事可讲，所以，在技术都相当高的前提下，师门传承、从业经历、家族历史、社会身份等成为大师评定系统可以量化的选择标准。通过布迪厄的“场域”框架，我们可以更好地理解紫砂工艺师通过层层评审晋升为大师的复杂过程，以及在此过程中形成的复杂关系网。在这种情况下，紫砂壶代表了非遗领域中的一种重要文化实践，同时又承担着引人注目的“文化事件”的角色。

如布尔迪厄所言：“不同的和分层的社会化实践，伙同教育制度去偏袒那些凭借其在阶级体系中的位置而成为文化资本的‘自然’继承人的社会成员。”这种社会资本的获得体现了政治社会中一种发挥作用的控制机制。“这种控制机制维持了一种特殊的社会秩序，维持了一种特殊的生产关系，维持了一种特殊的权力行使，而且让人感觉不到这种权力的行使。”对此，布尔迪厄的“实践理论”可以作出阐释，“权利通过对于既定秩序的实践证明来提供。这种秩序的获得是把社会活动资格与身份之间的公开系……用作一种烟幕来掩盖人们所获得的资格与他们所继承的文化资本之间的联系……”可知，“非遗场”中的这些文化资本、社会资本的行使是被遮蔽的，但这两种资本都可以转化成一种象征资本，并获得切实的利益。这种象征资本与传承人身份的获得有必然联系。

（门槛与（社会身份建构）过渡期的行为模式）

民间艺人如何将文化资本、社会资本的获得转化成某种场域中“社会身份”，这需要“门槛”与过渡期的，而门槛与过渡期又是充满竞争、甚至是颠倒性的付出。如民间艺人获得文化资本就得花时间和精力进入某种社会机构去“镀金”，得舍得花钱布置对外开放工作空间、处理新的人际关系，这些看上去都是跟直接获得经济利益像颠倒的行为，但这是非遗传承主体在社会身份建构的过渡期内所实施的“行为模式”，这种行为模式共同构筑了某种特定时间的“社会问题”与“社会现象”“文化事实”。

四、紫砂生态空间：从社会身份的建构到经济资本的实现以及文化再生产

布尔迪厄说“只有当人们感觉到社会身份受到威胁或者从中受益时，社会身份才变得重要”。当我在调查时间及社会上的评级标准对紫砂艺人的重要性时，受访者说：“这种评级肯定是必要的，紫砂艺人外出参加活动和策展的频率也与其身份息息相关。对于紫砂市场来说，艺人身份越高，参加社会活动就越多越具有社会影响力，其工作室名气越大越有效益”。这种回答基本成为紫砂圈内人士的共识。

通过这个共识我们也能更加理解紫砂壶市场的溢价严重，价格评判标准不统一的现状。在对一个负责网络销售紫砂壶的宜兴当地人采访时（家里也是经营紫砂行业的），她有提到一个很有趣的点，就是当他们的客户提出心理价位时，他们会根据不同的价位去寻找对接的紫砂艺人，对于较低的价格，他们会在销售的时候着力突出其高的性价比和质量，而对于较高的心理价位，他们在销售的时候会着力宣传其社会身份给其作品带来的附加价值（也反映有职称和无职称的关系）。

而将个人的身份建构置于更广阔的空间中，我们会发现文化再生产的身影。后非遗时代民间手艺人社会身份的建构，反映了“国家意识形态”作为一种现代权力机制，不再通过强迫性的手段来控制民众，而是通过教育、媒体、信仰体系去“招徕”个人。即布尔迪厄强调的：“人不是人格化的个体，而是社会过程中的创造要素。”可见，个人在主动性地赢得他们的社会身份的同时，占主导地位意识形态同时也对社会主体加以挑选和区分，进而把某种“意识形态”通过某些选定的“主体”传达给社会集体，以实现地方性社会文化的再生产。

总之，民间艺人“社会身份”的获得是多个社会话语权叠加的结果，是社会活动资格的获得，也是文化资本（师门的继承和流传）“自然”继承人的证明，是获得财富的有效手段。因此从事紫砂生产的民间艺人要想获得财富，就必然被卷入身份、技艺、社会资源、文化资本的社会生产网络中，这个网络充满了不同主体间的博弈与互惠，并重新塑造着他们的社会关系，这种社会关系又产生出新的社会文化规则、价值观与行为模式。

五、总结：

通过对围绕紫砂生产而展开的不同群体间的整体性分析，可以窥见作为文化体系下的民间艺术的变迁，与生产主体的行为与认知都不可避免的缠绕在一起。尤其是后非遗时代，由于生产主体对社会资本、文化资本以及技术资本的追求，形成了不同类型的生产模式，新的市场需求促生了生产主体身份的多元性，打破了旧秩序，包括邻里关系、师承关系，从而重构了一种建立在紫砂当代生产销售基础上的新型社会关系。有关民间传统手工艺的传承与发展，不能只看到民间艺人的功劳，也要看到多方力量的互惠与博弈，这里包括民间艺人与各方知识话语权的较量，利益之下的分合。

从后非遗时代紫砂工艺的发展状况来看，虽然从事紫砂生产的艺人仍是每年不少，甚至有更多的回乡大学生愿意投入这个行业，经过不同社会转型后的紫砂工艺，今天呈现出来的样态，已不能用数量来衡量它的生命力，而得从它的多元样态与社会发展类型

的关系来看,它已经形成了一个相对完整的紫砂生态圈。这个生态圈充满了竞争与希望,民间艺人在建构自身社会的同时,也被社会建构。
